Experience the Leader in Project Management Training

The Cheetah Learning Difference

Cheetah Learning	The Others
Start Monday. Pass the PMP test Friday.	Getting the PMP becomes a six-month second job.
Transformational lifetime learning experience you use the rest of your life. Cheetah Learning courses are designed by experts in accelerated adult learning.	Death by Power Point. You learn how to consume large amounts of caffeinated beverages – why? Because you have to stay awake. Many organizations rely on non-qualified volunteers to design their PMP Prep material who do not know how to create effective learning programs.
You start with Cheetah, and you finish with Cheetah – complete solution from A to Z on becoming a PMP.	You're left in the dark on exactly how to get your PMI Eligibility and how to use what you learn to actually pass the PMP exam.
Every class listed on the website is actually a real class (and many sell out). Cheetah is licensed and pays taxes to do business in every single municipality listed on its website.	Most of the classes listed on their websites are cancelled or are fake classes. Many competitors who list more than 10,000 students have only had about 600 students. Do a little digging, and you'll discover the truth. Many are also not licensed to do business in the cities where they supposedly offer classes.
Certified Cheetah PMP Instructors have been coaching students to pass the PMP exam for a decade. These are real people, and this is their full-time job.	Check out some of these folks – they don't even list the instructor's last names. It appears some companies are using the same instructors – how many different companies do these instructors teach at, anyhow? And how good are their programs if their teachers need to get work in multiple locations? For those legitimate operations, how sharp are their skills if they only teach the PMP exam prep course twice a year?
Cheetah updates its course material every month so you have the best chance of passing the most current exam PMI is giving. (Yes, PMI changes the exam that often.)	Many other groups doing PMP exam prep use unauthorized old copies of Cheetah's materials that someone who took Cheetah's class years ago copied, and then put their company name on the footer and header.
A complete passing guarantee – if you don't pass the PMP exam after three attempts, not only do you get ALL your money back, you also get the two other retest fees back too. Cheetah is out an additional $550 if you don't pass. Why can we do this? Because Cheetah students pass the PMP exam.	A partial guarantee – they take administrative fees, deduct what they paid for you to retake the exam. So you only get back maybe half of what you paid. Then you have to wait a year before you can try to take the PMP test again. Many students sign up for Cheetah the second time around.
Cheetah Learning was awarded PMI Provider of the Year for its Accelerated PMP Exam Prep Program. When you register for a Cheetah Learning course, it is the ENTIRE experience that helps you PASS the PMP exam at Cheetah Speed.	Many companies and PMI Chapters use incomplete elements of Cheetah's material. We do put a stop to this when we become aware of it, as it is illegal. If you see the Cheetah Learning logo or hear the Cheetah name – they are not authorized to use Cheetah material. And while you may have a few, very outdated Cheetah documents, you are NOT taking a "Cheetah" course. You will not have the best chance of passing the PMP exam with this approach.
Cheetah Learning provides an incredible learning experience, a proven approach, and you get your PMP, FAST.	How good is something that is "priced right" when you don't accomplish what you set out to do – pass the PMP exam?
Bottom line – With Cheetah Learning, you reduce your risk and increase your ability to pass the PMP exam. Cheetah Learning attracts the top people in every industry.	Bottom Line – With the others you increase your risk and reduce your chances of success as a Project Manager. This is a "buyer beware" situation. If it's not Cheetah Learning, you are not taking a Cheetah Learning class.
