

The purpose of Cheetah Reading is to read faster with more comprehension and retain the information you learned longer. The human mind develops comprehension and remembers by making linkages to what you already know. By Cheetah Reading, you help your mind create those linkages. By structuring your reading efforts with the schedules, you stay focused longer, and develop a reward feedback system that motivates you to continue - this is especially good for dry technical reading.

Give these seven easy steps a try and watch how quickly you can gain the knowledge from books that are important to your success.
